Plug and Play

Mains Fed

Ease of Installation

Hot or Cold Options

Applications Include:

Why do I need the WashStation?

The WashStation is the perfect solution to encourage your family, team members, customers or clients to wash their hands before entering your premises, as we continue to practice hand hygiene in the battle against the spread of COVID-19.

The WashStation is a very effective way of maintaining good hand hygiene. To ensure an effective water supply where there are potentially low water pressure issues, you can consider a water boosting option from our Multiboost range at [Multiboost.ie](https://www.multiboost.ie)

Do I need the HeatStation?

Depending on your particular requirements, the addition of a HeatStation to your WashStation is a compact way of providing a hot water option for end users.

How do I connect the WashStation to my premises?

The WashStation connects easily to any outdoor or indoor water supply and comes as standard with a 1/2" water connection.

Will it be noisy?

As the majority of WashStations are mains fed, there are no issues concerning noise. For the pumped version where required, it incorporates an efficient and low noise pump option where the dB(A) at 1m distance will be less than 51.

Is it easy to install?

The compact nature of this unit is designed to remove any installation headaches. It is a packaged unit and therefore is fast and easy to install. It can also be pallet mounted.

Where can I use it?

The WashStation has been specifically designed for outdoor or indoor use at home; on construction sites; commercial premises; factories; fuel station forecourts; golf and sports clubs; farmyards; marts; community centres; schools; crèches as well as many other locations and applications.

Does my water supply matter?

Water pressure to tap will vary depending on whether you have a gravity supply (low pressure) or a pressurised supply. To increase incoming pressure, simply add a Multiboost boosting system. For more, go to [Multiboost.ie](https://www.multiboost.ie)

What about frost protection?

As with any appliance which is water fed and is located outdoors, there is a requirement for frost protection so it is important to provide this protection for any pipework, taps, etc.

The WashStation Range consists of:

- Maxi Mini HeatStation
- MaxiSlim Micro HandWash & SaniStations

At Home

At Work

At Play

About

This portable, plug and play WashStation unit can be configured for gravity to drain or pump to drain options.

There is also a heated option available by adding a HeatStation.

Multiple cold WashStations can be connected together on construction sites at a 2m distance in accordance with social distancing guidelines.

Key Features

- › Non-corrosive, durable holding tank
- › Tank drain-off fitting
- › Elbow push tap
- › Mains water feed
- › Euro pallet mounted option
- › Pumped version available (if required to pump to drain)
- › Easy assembly (plug and play)

About

The MaxiSlim is specifically designed for those working within more compact or confined spaces.

The MaxiSlim has a narrower footprint, while the Deluxe version has a stainless steel backboard which can also support a soap and tissue dispenser if required.

The 30L MaxiSlim can be configured for gravity to drain or pump to drain options.

The MaxiSlim can also be transformed into a hot water option by adding the HeatStation.

About

Perfect for small hands in creches, schools and other high traffic areas, the 20L Mini can help to educate our children in hand hygiene from an early age.

The use of colourful, cute cartoons and icons will keep the little ones entertained while they follow the 6 easy hand washing hygiene steps on the side of the unit.

Key Features

- › Non-corrosive, durable holding tank
- › Tank drain-off fitting
- › Elbow push tap
- › Mains water feed
- › Easy installation (plug and play)

About

Depending on your requirements, you can customise your WashStation by adding a plastic mounted HandWash Station or Sani Station.

The boards are lightweight, durable and made of plastic.

The HandWashStation consists of a soap and tissue dispenser, while the SaniStation is perfect for outdoor activities and areas such as sports clubs and parks and consists of two hand sanitiser dispensers.

Key Features

- › Non-corrosive, durable
- › Standardised refill options
- › Easy installation (plug and play)
- › Accessible
