

CASE STUDY

# Hamilton WwTW Upgrade

**Ferrier Pumps were engaged to provide a full MEICA package for the removal of seven MCCs and installation of one new central MCC at Hamilton Wastewater Treatment Works.**

This included installation and commissioning of the existing inlet plant process now supplied from MCC1003. Scottish Water worked with Amey Binnies to develop a solution due to the deterioration of the existing assets and plant failures.

START DATE  
**Oct 2021**

CONSTRUCTION PERIOD  
**11 Months**

PROJECT TYPE  
**Wastewater  
Treatment  
Works**
